ConstruPilot

PRE-SEED · WEB SUMMIT LISBON · 9–12 NOVEMBER 2026

The vertical software for construction

Pricing an architect's bill of quantities, take-offs on plans and progress invoicing in one base, for tradespeople and SMEs in France and Portugal.

Confidential document

THE PROBLEM

Construction margins vanish in the back office

Everything in spreadsheets

Bills priced by hand, take-offs redone, quotes without a reliable price library.

Costly omissions

Specified items never priced, deposits not deducted, retentions never claimed.

Three tools, no link

Management, pricing and site tracking live apart: the glue is human, so expensive.

THE PRODUCT

The full chain, from bill to final account

One single record

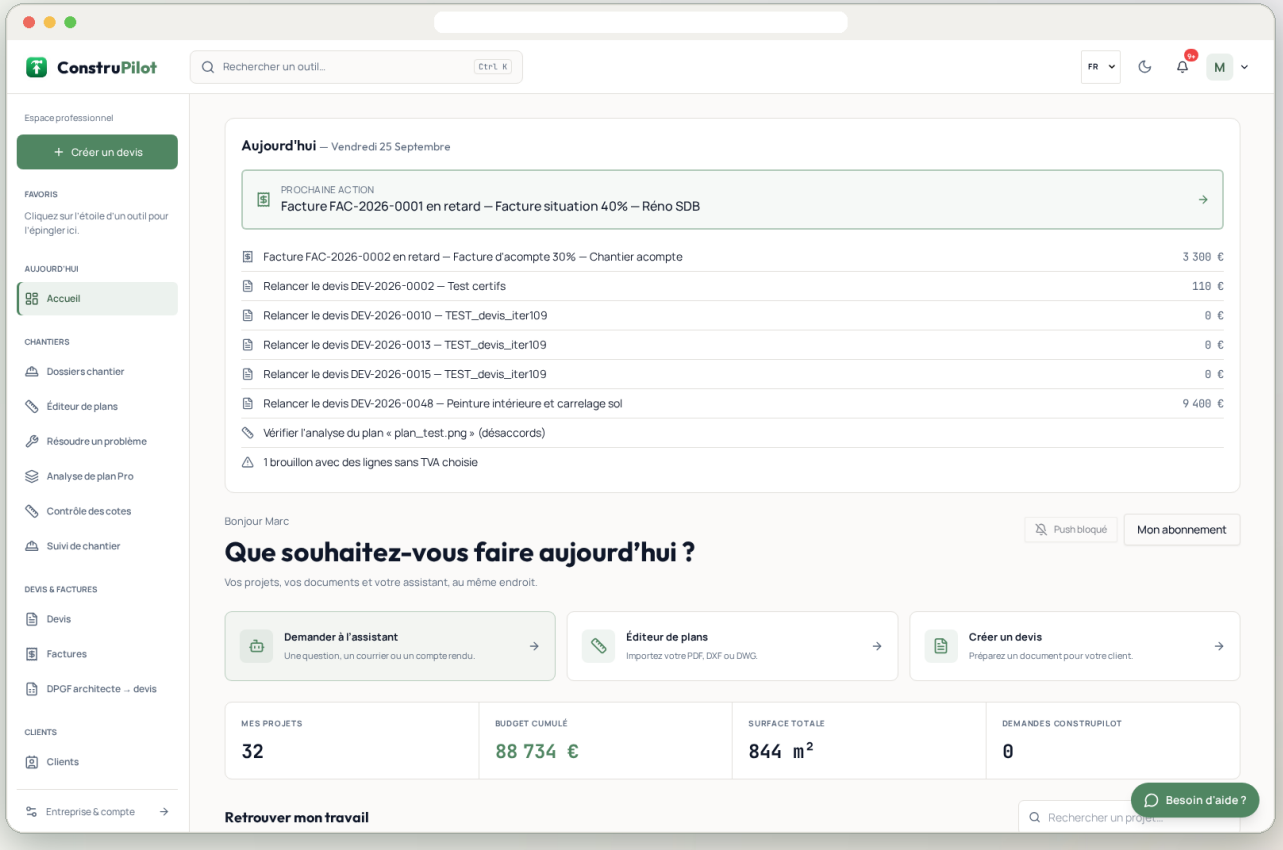

From the architect's bill of quantities to the final account.

All back-office work

Estimate, take-off, bills, quotes, site, progress claims, final account, client portal.

Web and native apps

Android and iOS for the field: photos, snags, dictation, signature.

Real screenshot of the platform (French version)

ENTRY POINT

Pricing a bill of quantities: hours to minutes

Multi-bill reading

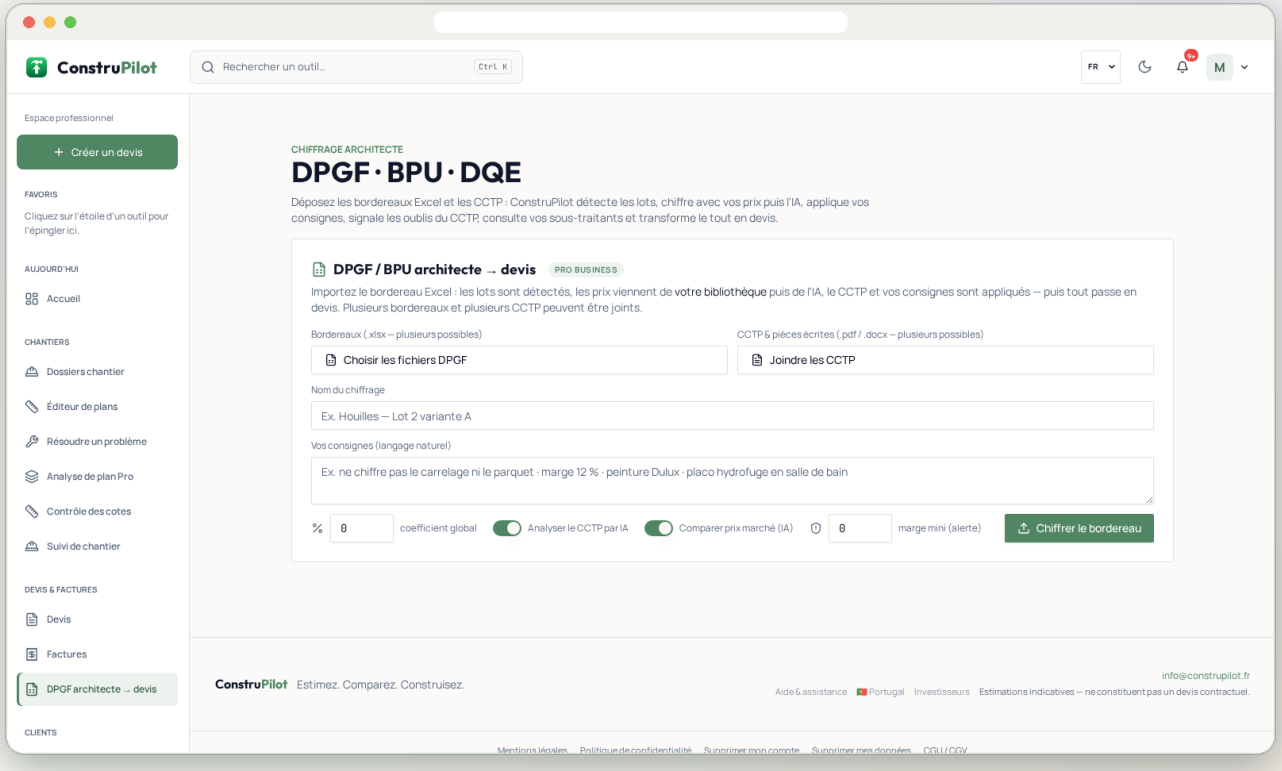

Several Excel files and specifications per study, varying headers handled.

Library first

Company prices, AI only for unknown lines, every source tracked.

Margin control

Margin per trade, low-margin alert, items missing from the bill detected.

Real screenshot of the platform (French version)

RETENTION

Where margin is recovered: invoicing

Automatic deposit

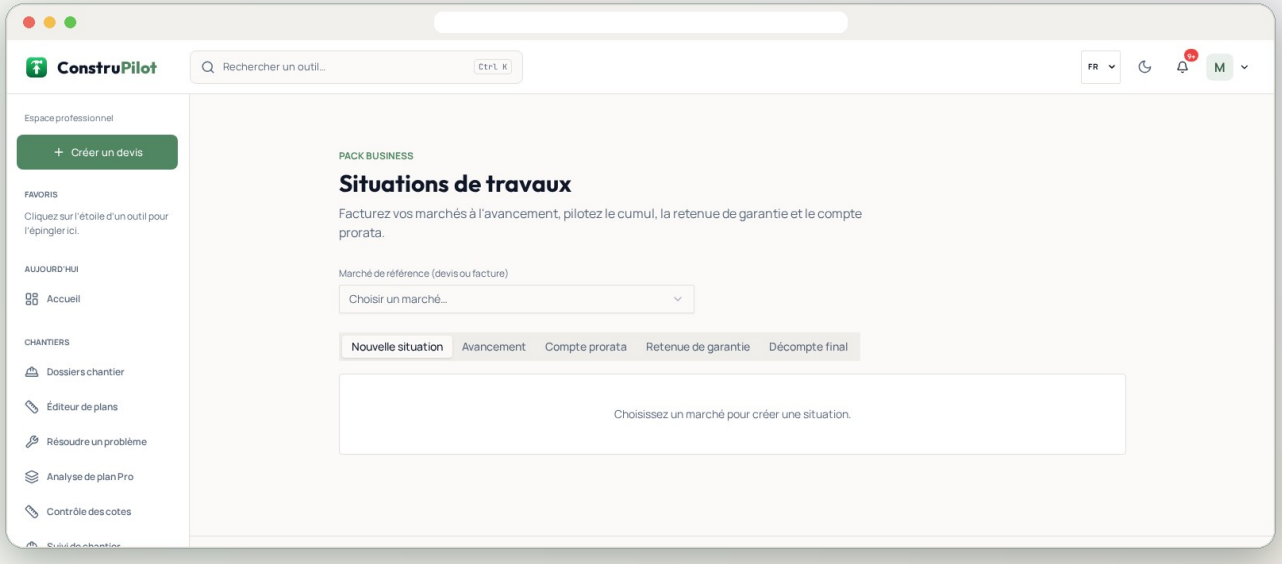

Created on signature, then deducted from progress claims once received.

Progress claims and retention

Line-by-line progress, payment certificate, final account in one click.

Measurable benefit

Cash collected earlier, margin kept: users quantify it themselves.

Real screenshot of the platform (French version)

THE MARKET

Two markets, the same pain

France

450,000 construction companies

€193 bn turnover in 2025

1.73 M people in the sector

FFB 2025 · CAPEB Q4 2025 · INSEE

Portugal

114,000+ construction companies

€39.1 bn turnover 2024, +10.2 %

460,000+ people employed

INE 2024

95 % of French construction companies are craft businesses: our target, 1 to 20 people.

COMPETITION

Others cover one link, we cover the chain

	Quotes & invoices	Take-off software	Construction ERP	ConstruPilot
Bill of quantities pricing	—	partial	✓	✓
Take-offs on plans	—	✓	partial	✓
Progress claims, retention, final account	partial	—	✓	✓
Verifiable AI, price sources	—	—	—	✓
Affordable for 1 to 20 people	✓	✓	—	✓

Switching cost: the company's price library grows with every job.

MEASURED TRACTION

Measured numbers, never reconstructed

34

accounts (excl. tests)

14

active in 30 days

8

active paid subscriptions

81

quotes and invoices created

Measured in the database on 1 Nov 2026, 30-day window. Platform live in France and Portugal, patent no. FR2611044.

BUSINESS MODEL

Recurring revenue, from tradesperson to SME

Free
Homeowners

€0

2 active projects · 3 detailed estimates per month

Premium
Homeowners with several projects

€19 / month

or €190 / year · unlimited projects · quote scanner

Pro
Tradespeople, sole traders, micro-firms

€149 excl. VAT / month

or €1,570 excl. VAT / year · 1 user · quotes from a plan, specification, photo or voice

Most complete

Pro Business
SMEs, general contractors, engineering offices

€249 excl. VAT / month

or €2,490 excl. VAT / year · 5 users · invoicing and e-invoicing included, HR, site tracking

Project Pass
€50 one-off · 1 full project, 90 days

Invoicing option
€5 / month (included in Pro Business)

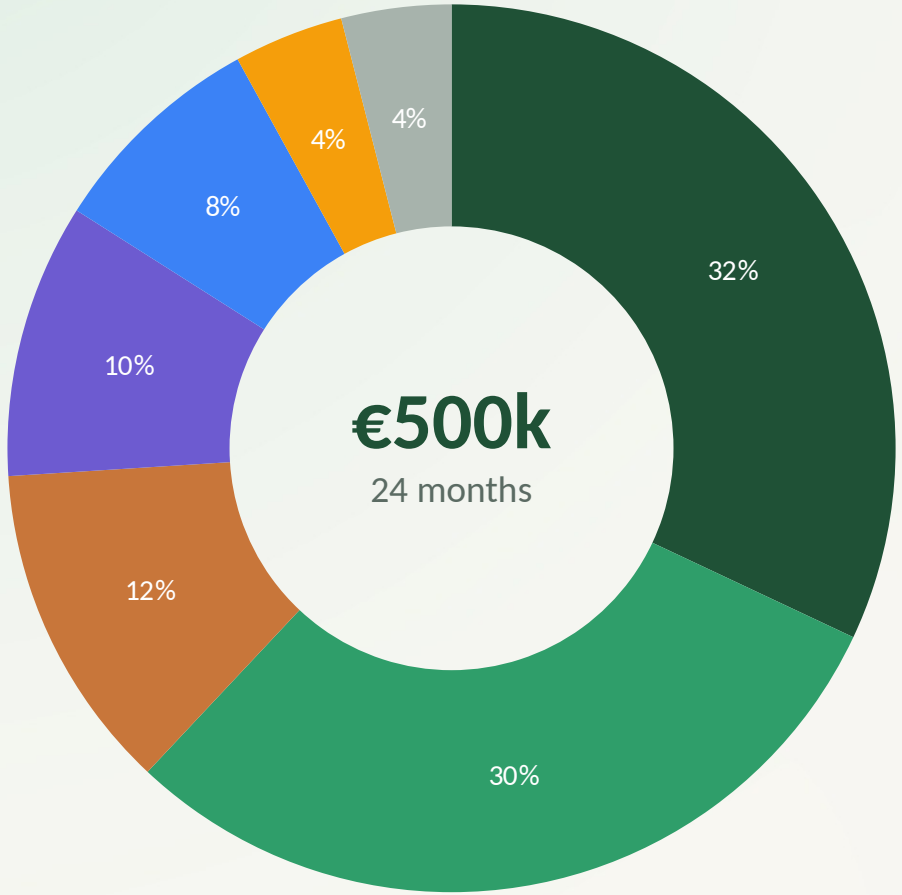

AI renders
3D image €5 · 3D video €10

API
Starter €99 · Business €299 · Scale €999 / month

7-day free trial on paid plans, no commitment. Prices as of 1 Nov 2026; the pricing page on construpilot.fr prevails.

OPERATING PLAN

€500,000 over 24 months

Acquisition & sales	€160,000
Product & tech	€150,000
Content & marketing	€60,000
Infrastructure & AI	€50,000
Support & customer success	€40,000
Compliance & legal	€20,000
Reserve	€20,000

≈ €20,800 per month

MILESTONES

24 months to roll out the chain

Months 1–6

First paying customers, industrialised bill pricing, apps on the stores

Months 7–12

Controlled acquisition: SEO, field sales, merchants; accounting integrations

Months 13–18

Sales team, regional roll-out in France and Portugal

Months 19–24

Open API, distribution partnerships, preparing for Europe

RISKS

Risks and our answers

AI price quality	Company library first, every price editable and archived
Dependence on one AI provider	Three interchangeable providers behind one interface
Heterogeneous bills	Tolerant reading and line-by-line correction
Cost drift	Spend tracked per envelope, monthly reconciliation
GDPR and store compliance	Legal pages, self-service deletion, access logging

WHAT WE ARE LOOKING FOR

More than funding: access to the market

Market access

Federations, craft groups, building merchants and project managers.

Sales capacity

Fund a field sales cycle and the hires over 24 months.

Integration partners

Accounting software, material distributors, plan platforms.

Governance

Quarterly reporting on the same measured indicators.
